Polish Navy – Evolution of the MIECZNIK Frigate

Dossier

News from Navies and Naval Industry

Huge stockpiles of near-obsolete systems, capability gaps in the fields of modularity, commonality and interoperability, as well as new forms of threats will force naval fleets around the globe to seek more advanced self-defence systems. Defeating such threats requires quick response effectors that are capable of intercepting and neutralising advanced airborne threats in an ever more complex tactical environment.
