

NAVAL FORCES

INTERNATIONAL FORUM
FOR MARITIME POWER

*Navies are preparing to defend against increasingly deadly threats. Many surface ship classes are to be shaped-up to better defend against the threat posed by any kinds of kinetic weapons – and drones. Recent developments in the Black Sea Region and in the Arabian/Persian Gulf and Red Sea – all of which are conflict zones par excellence – provide evidence that both hard-kill and soft-kill weapon systems form a significant element of the detect-control-engage chain at sea.
